Professional backpack manufacturer, providing reliable solutions in one stop

ABOUT US

Chinee Backpack Co., Ltd., a subsidiary of Chinee Group Limited, is a highly influential professional enterprise in the global backpack field, specializing in the research and development, production, and OEM customization services of backpacks.

The company has a modern factory, which embodies its strong manufacturing capabilities in the backpack industry. Equipped with a full set of fully automated high-end production equipment, including precise cutting machines, flexible sewing machines, and computerized embossing machines, every production process is strictly controlled to ensure product quality. With its powerful production capacity, the company has an annual output exceeding 5 million pieces, enabling it to meet the demands of orders of various scales from around the world promptly. Whether it's the meticulous requirements of high-end fashion brands or the massive orders for hot-selling products on cross-border e-commerce platforms, the company can handle them with ease.

The company has a modern factory, which embodies its strong manufacturing capabilities in the backpack industry. Equipped with a full set of fully automated high-end production equipment, including precise cutting machines, flexible sewing machines, and computerized embossing machines, every production process is strictly controlled to ensure product quality. With its powerful production capacity, the company has an annual output exceeding 5 million pieces, enabling it to meet the demands of orders of various scales from around the world promptly. Whether it's the meticulous requirements of high-end fashion brands or the massive orders for hot-selling products on cross-border e-commerce platforms, the company can handle them with ease.

In terms of OEM services, leveraging years of industry experience and a professional team, the company offers comprehensive customized services throughout the entire process. From creative product design and development, to the precise manufacturing of molds according to customer requirements, to the meticulous creation of high-quality samples for prototyping, and finally to the large-scale stable mass production and delivery, every link is subject to strict quality control and professional service support. Moreover, to meet the diverse needs of customers, the company supports small-batch trial production with a minimum order quantity as low as 500 pieces and can flexibly adjust production scales according to customer demands, efficiently responding to orders ranging from several thousand pieces to millions of pieces, truly achieving customized production and precise manufacturing. The product range is rich and diverse, covering multiple series such as hiking backpacks, business and casual bags, children's schoolbags, and eco-friendly shopping bags, meeting the diverse needs of different customer groups. In product design, the company focuses on perfectly integrating functionality with a sense of fashion. It adopts lightweight EVA materials, making the backpacks both lightweight and having good elastic cushioning properties to reduce the carrying burden. High-quality waterproof Oxford fabrics are selected to effectively resist the influence of harsh weather and environments, extending the service life of the backpacks. At the same time, combined with the principles of ergonomics, the backpack's carrying system, shoulder strap structure, and back panel shape are carefully optimized to make the backpacks fit the human body curve better, reducing the pressure on the shoulders and waist and improving the user's comfort experience.

The company attaches great importance to product quality and environmental protection. The factory strictly adheres to the ISO 9001 quality management system certification standards and has established a complete quality management system. From raw material procurement, production processing to product quality inspection, every link is strictly monitored to ensure that high-quality products are provided to customers. At the same time, the company actively fulfills its social responsibilities, strictly implements international environmental protection standards such as REACH and RoHS, is committed to reducing environmental pollution in the production process, and promotes the green and sustainable development of the industry.
